

Stablemate™

CLEAN. SANITISE. PROTECT.

Boxfresh

Professional Cleaning Product for the Equine Industry.

A pine based multipurpose detergent concentrate with excellent cleaning properties that cleans and deodorises leaving a fresh pine aroma after use.

This heavy duty stable cleaner is specifically formulated for use in high soil and high traffic environments. It's ideal for use in steam cleaners and auto jets.* Also suitable for use on most hard surfaces in stables, horseboxes, stall mats, floors, walls, doors, worktops, ceramics and paintwork.

Boxfresh is packed in 1 litre bottles which are fitted with a precision dosing system that allows the user to dispense 20ml, 40ml or 60ml of product, controlling usage without the need for expensive dosing equipment. With accurate dosing assured it is a straight forward process to produce 5, 10 and 15 litres of cleaning solution to clean large areas.

* Please ring for more details.

Cleaning:

The cleaning process should commence with the removal of any bedding or gross debris from the area to be cleaned.

Via high pressure washing equipment

- Produce a working solution and add to the chemical tank on the equipment or in a suitable container if the equipment is fitted with a chemical pick up pipe.
- Set the dosage rate on the equipment to the midpoint which will allow increasing or reducing if required.
- Apply the product via low pressure.
- Allow a short dwell time of a minute or two to allow the solution to soften the soils.
- Then rinse at high pressure.

Note if the equipment has a hot mode this will aid the cleaning process.

Manual cleaning – Mopping / Brushing

- Make up a working solution in a suitable bucket.
- Apply the working solution liberally to the surface.
- Allow a short dwell time of a minute or two to allow the solution to soften the soils.
- Then agitate the surface with a stiff brush to aid loosening.
- Finally rinse with clean water via swilling, hose or pressure washer.

Stablemate™

CLEAN. SANITISE. PROTECT.

Instructions for use:

Ensure the cap is tightly closed before following these instructions

Step 01.

Turn the bottle upside down to fill the dosing chamber

Step 02.

Tilt the bottle to get the required dosage

Step 03.

Unscrew the closure

Step 04.

Pour out the liquid

Dosing rates:

Add 20ml to 10 litres of water* for **general maintenance and hard surface cleaning.**

Add 40ml or 60ml to 10 litres of water** for **heavily soiled surfaces.**

Add 60ml to 10 litres or 120ml to 20 litres for use via **a high-pressure washer.**

Note when adjusting the dose by tipping the bottle in Step 02 it is the guide line on the left that you use so that when upright you have the correct dose which can then be checked against the level line on the right side. In the case of the 20ml dose the left side guide line is right at the bottom of the chamber.
