

Stablemate Tips

Yard Risk Assessment

Points to consider when conducting a yard risk assessment

1. What type of horse business do you run?
2. How many horses do you have on your yard?
3. What are the ages and group sizes of the horses on your yard?
4. How often do you accept new arrivals?
5. How often do horses from your yard mix with horses from elsewhere and under what circumstances? e.g. during training, showing, racing, competition, hunting, eventing, polo etc.
6. How often do other horses visit your yard?
7. Is there any possibility for contact with horses on neighbouring properties e.g. over fences/gates?
8. Do any staff members handle horses kept on any other premises?
9. Has there ever been a confirmed case of a communicable disease on your yard? e.g. Strangles
10. Are all horses on the yard wormed regularly and up to date with their vaccinations for Equine influenza?

Ask your vet to help you with your risk assessment to identify where and how biosecurity measures can be improved or introduced. The AGMA team will be happy to assist you with advice on the correct application of the Stablemate by AGMA range of cleaning & disinfectant products.
